We are your constituents, and we are concerned about the impacts of the attacks on science and public health coming from Congress and the current administration that we're seeing here in our state. Today, scientists from around the country are mobilizing by taking photos outside of their legislators' offices to **sound the alarm and call out the harm** caused by the Trump administration's anti-science agenda.

We demand that you stand up to the Trump administration and vote against this administration's attacks on science.

When you go back to Washington, D.C. next month, we expect you to stand by your constituents, and to stop capitulating to Trump and his cronies. Your constituents need you to defend science, and you can do so by co-sponsoring the following key pieces of legislation that will prevent any further Reductions in Force (RIFs) at the federal scientific agencies that protect our community.

Senate		House	
S.2633	Saving NOAA's Workforce Act	H.R.2211	Saving NOAA's Workforce Act
S.2632	Saving NASA's Workforce Act	H.R.2210	Saving NASA's Workforce Act
S.2631	Saving NIST's Workforce Act	H.R.2209	Saving NIST's Workforce Act
S.2630	Saving NSF's Workforce Act	H.R.2208	Saving NSF's Workforce Act

Until you do, we and the other experts and science defenders in your state will continue to sound the alarm and call out the harm of anti-science actions!

Sincerely,

<hr/>	<hr/>
<hr/>	<hr/>
